

Warning: this story is too violent and full of blood, they also touch on serious topics

Chapter 1: The Attack

It all started a long time ago in universe 693 in a galaxy called Lédagen there was a planet whose name was Ózëm, there was a young peasant who was quite disciplined and focused on his life; And that young peasant is me, belonging to a low-class family and scarce resources, possibly the worst place where I could have been born because since I saw the princess of Séntai Tám I fell deeply in love with her and being who I am, my possibilities are nil.

The Sonòpi are a peaceful species, we have never had a war between us, but we have foreseen an alien invasion, they have already been in our history and they will return, but nobody knows exactly when.

One day I woke up, I saw my family terrified and packing their things, my brother told me “good that you wake up, we must go”, I asked him why and he told me that there was no time to explain and I should hurry.

Chapter 2: Traumas

I never thought that I would not return to my home, piercing screams were heard everywhere, it was the most horrible thing I could hear.

At that time I thought about being a hero and showing the princess of Séntai Tám what I was really worth, I separated a little from my family and never saw them again.

I went to Séntai Tám in search of the princess, I saw her outside the castle bleeding and barely able to speak, I asked her what had happened and she said that she must flee outside the six kingdoms; the yachne had come to exterminate the species in search of expanding their dominion throughout much of the galaxy, “wherever you go you will not be safe, you must go to another galaxy” she said, these being her last words.

I returned to my family and I wanted to erase that horrible image from my mind, their bodies were bleeding and they could not speak to me, at that moment I swore that I would take revenge no matter what I should do.

I took one of the ships and left, I practiced crew for years, surely something will do.

Chapter 3: My new home

After a while I found a planet without yachne presence, every night there is like being in hell, I do not stop dreaming about my family and the war, I just wanted to die, now I am the one who gives the heartbreaking screams.

Very close to death, I saw him, the most powerful being of all the multiverses, yashonze, took me with him and mentioned that not everyone has the same luck, only intelligent life capable of crying out for others and of course a cold heart.

I asked him what he was talking about and he said that I would have the opportunity to become the god of my universe, without thinking I accepted, he used an unknown technology for any sonopi, suddenly my perception of time and space changed, now I can see the infinite possibilities and among other powers.

Like anything, I had to give something in return, they asked me to break my promise about revenge since it is characteristic of inferior beings.

I superficially renounced my promise, I knew I couldn't deliver something like that, but sooner or later bad things would happen to me.

Chapter 4: Training

These powers are not for everyone, I did not fulfill a characteristic, they warned me that sooner or later I would be corrupted by my feelings, even so we ran the risk.

The first thing they taught me was to modify the subject to my pleasure, it is fantastic; Later they taught me to create all kinds of holes to be able to travel through space time, it is inconceivable to me the concept of everything that I now have in my hands.

I can not only modify matter, but also energy, I have matter and energy compressed in me; few mortals could bear this power.

The nightmares remain in me, little by little I stop feeling pain; I told yashonze about my deep need to relieve pain, he taught me to transport myself to other existential planes, I was able to speak to my family, I told them that I regretted leaving them and that I love them, they reminded me of my promise as they followed me in another plane; At that moment I remembered the teacher's warning.

Chapter 5: Revenge

Being new to the handling of powers, I allowed myself to be corrupted by my feelings; I went to the root planet of the yachne willing to destroy it without compassion, I lost control, the black hole had absorbed the entire planet.

Yashonze arrived, went back in time with his watch and gave me permanent punishment, I became a mortal again, but I kept my powers.

I spoke with the teacher about my needs and feelings, he gave me a solution, after 800 years I would find love, I waited for 800 years and he showed me Shali, the goddess of universe 324, she was also mortal, but unlike me, does not have so many feelings.

After a few years I had children with her, the teacher appeared and I said "it is possible that you will never forgive me, but my children are not to blame for anything so far, please I do not want to transfer my punishment".

My new wife asked me, I had to tell her the truth or else my teacher was going to do it.

Chapter 6: Goodbye House

I always knew the age of my planet's star, but outside of it I had no idea how time passed.

I went immediately to see my planet for the last time, even though it is no longer the same place, it still makes me very nostalgic to see it; but what happened, the star had grown, Ózēm was the closest planet, I only stayed there about 100 more years to see how it was consumed by my star.

100 million years later I went back to my system just to see my star go out, I said goodbye, I knew it would happen, but I didn't want to witness it, I still had to know about my old home.

That was just the beginning of the worst, I also knew that my galaxy would collide with the closest one, after 1000 years of seeing them merge, I did not stop crying, I did not want to recognize what was happening.

Regardless, Universe 693 would also come to an end, but fortunately I wouldn't live to see it.

Chapter 7: The Final Farewell

It is my last days, I can barely remember some things, I have kept all my promises, I am ready to leave this material plane.

Around me were my wife, my children and the teacher, before leaving he took away all my powers to prevent my return to the material world.

A very bright white light appears, I see myself, I leave my body forever and on top is my family waiting for my arrival.

I hear a voice saying "you can visit us whenever you want, but we will never interact again".

Bonus Chapter: My origin

It was a difficult time to buy food, so my parents, without knowing each other, looked for seeds in this field, searching the ground they shook their heads and began to talk, my father promised that he would return the next day, the days passed and instead of looking for seeds they were appointments .

One day the relationship became formal and my mother became pregnant; "Your belly is too big, surely it is more than a descendant" said my father.

I still remember the first day I was conscious, I was in a hospital and they gave me medicine, it had a horrible taste, after that place we returned home, I couldn't believe anything, everything seemed surprising to me.

This is how we grew up, but my childhood ended the moment I felt attraction to someone, one afternoon the princess of Séntai Tám came with her army and her parents were still alive; When I saw her I felt immense desire to run and hide.

I played being a dream knight with my younger brothers, and every night I had the same dream, but why would she notice someone like me? I am only a simple son of peasants and I will never be able to serve her; I hope someday I can at least talk to her.
